SUBMERSIBLE PUMP

**TOGETHER WE CAN DO IT  
TOGETHER WE HAVE ALWAYS DONE IT**

## MISSION

Company has well developed extensive manufacturing set up to meet any market demand in volume and quality thanks to its technologically advanced facilities.

## VISION

Satisfied customer is our highest achievement which "Keeps us constantly striving to serve our customers with integrity and quality." Focusing on this goal with vigorous team efforts, we promise to serve them to deliver only the best.

## QUALITY

In order to maintain the highest quality and performance of our pump sets the company has facility of ultra-modern testing and inspection instruments for continuous monitoring manufacturing process. We have electronic flow-meter in the computerized testing laboratory which provides unique facility of testing multiple pumps simultaneously for head versus discharge and overall efficiency at various position minimizing the time and human error thus making the performance report more authentic and reliable.

## CUSTOMER FOCUS

At Unnati, customer is focus of attention for all activities at all level and every care is taken to see him delighted. His enquiry prior to sales is promptly responded for techno-commercial details and after sales-services to develop his confidence in our product and services. Utmost care is taken to define customer requirements or complaints by providing prompt and proper corrective actions thereby keeping him satisfied. Suggestions and complaints are also invited from the customers periodically to find out whether they are satisfied with the performance of product, timely supplies, packing & dispatch, behavior and attitude and whether they are really satisfied with the corrective actions taken.

## An IS/ISO 9001:2015

Company Unnati Pumps Pvt. Ltd. has privilege to be one of the pioneer manufacturing units of India manufacturing Submersible Pump sets to obtain International Quality System Certification ISO 9001 way back on 15<sup>th</sup> August 1995.

## Our Presence in GOVERNMENT OF INDIA

- Gujarat Water Supply & Sewerage Board ( GWSSB)
- Department of Agriculture - Gujarat ( I-Khedut )
- Department of Agriculture - West Bangal
- Department of Agriculture - Bihar
- Maharastra Jeevan Pradhikaran ( MJP )
- Andhra Pradesh State Irrigation Developament Corporation Limited(APSIDC)
- Public Works Deparment PWD - Rajasthan
- PHED - Rajasthan

## The Key

to our growth and success is simple

Together we can do it  
Together we have always done it

## V5/V4 WATER LUBRICATED PUMPSET

### PRODUCT FEATURE

- Unnati V5-V4 Water Lubricated Submersible Motor are robust Rewindable and pre-filled with clean water mixed with anti- corrosion fluid.
- Stator shell with corrosion resistant Stainless Steel.
- Bearing: Water lubricated radial and thrust bearing.
- Shaft extension made of Stainless Steel AISI 420.
- High efficiency electrical design for Lower Operating Cost.
- Pressure compensation diaphragm.

### PRODUCT APPLICATION

"Unnati" prime mover Submersible Motors are suitable to couple with deep well Submersible Pump used for:

- Residential Purpose
- Oil & Gas Industries
- Irrigation
- Gardens & Horticulture
- Fountains
- Drip & Sprinkler Systems
- Industrial water supply
- Mining Industries
- Pressure Boosting Units
- De-Watering
- Fire Fighting

### PERFORMANCE RANGE

Power Range	: 4.0 Hp to 10.0Hp(3.0kW to 7.5kW)
Phase	: Three Phase
Stage	: 35 to 90 Stage
Max. Head	: 30 to 400 Meter
Discharge Range (LPM)	: 24 - 222 LPM

## V6 PREMIUM WATER LUBRICATED PUMPSET

### PRODUCT FEATURE

- Unnati UL6 Water Lubricated Submersible Motor are robust Rewindable and pre-filled with clean water mixed with anti- corrosion fluid.
- Stator shell with corrosion resistant Stainless Steel.
- Bearing: Water lubricated radial and thrust bearing.
- Shaft extension made of Stainless Steel AISI 420.
- High efficiency electrical design for Lower Operating Cost.
- Pressure compensation diaphragm.

### PRODUCT APPLICATION

"Unnati" prime mover Submersible Motors are suitable to couple with deep well Submersible Pump used for:

- Residential Purpose
- Oil & Gas Industries
- Irrigation
- Gardens & Horticulture
- Fountains
- Drip & Sprinkler Systems
- Industrial water supply
- Mining Industries
- Pressure Boosting Units
- De-Watering
- Fire Fighting

### PERFORMANCE RANGE

Power Range	: 2.00Hp to 10.0Hp
Three Phase	: 1.50kW to 7.5kW
Stage	: Up to 30 Stage
Max. Head	: 20 to 210 Meter
Discharge Range (LPM)	: 30 - 1660 LPM

## V6/V7 & V6/V8 WATER LUBRICATED PUMPSET

### PRODUCT FEATURE

- Unnati UL6/7 & UL6/8 Water Lubricated Submersible Motor are robust Rewindable and pre-filled with clean water mixed with anti- corrosion fluid.
- Stator shell with corrosion resistant Stainless Steel.
- Bearing: Water lubricated radial and thrust bearing.
- Shaft extension made of Stainless Steel AISI 420.
- High efficiency electrical design for Lower Operating Cost.
- Pressure compensation diaphragm.

### PRODUCT APPLICATION

"Unnati" prime mover Submersible Motors are suitable to couple with deep well Submersible Pump used for:

- Residential Purpose
- Oil & Gas Industries
- Irrigation
- Gardens & Horticulture
- Fountains
- Drip & Sprinkler Systems
- Industrial water supply
- Mining Industries
- Pressure Boosting Units
- De-Watering
- Fire Fighting

### PERFORMANCE RANGE

Power Range	: 5.0Hp to 25.0Hp
	: 3.70kW to 18.5kW
Stage	: 1 to 7
Max. Head	: 5 to 100 Meter
Discharge Range (LPM)	: 150 - 1800 LPM

## V6 KLASSIC WATER LUBRICATED PUMPSET

### PRODUCT FEATURE

- Unnati UL6 Water Lubricated Submersible Motor are robust Rewindable and pre-filled with clean water mixed with anti- corrosion fluid.
- Stator shell with corrosion resistant Stainless Steel.
- Bearing: Water lubricated radial and thrust bearing.
- Shaft extension made of Stainless Steel AISI 420.
- High efficiency electrical design for Lower Operating Cost.
- Pressure compensation diaphragm.

### PRODUCT APPLICATION

"Unnati" prime mover Submersible Motors are suitable to couple with deep well Submersible Pump used for:

- Residential Purpose
- Oil & Gas Industries
- Irrigation
- Gardens & Horticulture
- Fountains
- Drip & Sprinkler Systems
- Industrial water supply
- Mining Industries
- Pressure Boosting Units

### PERFORMANCE RANGE

Power Range	: 7.50Hp to 36.0Hp
	: 5.50kW to 26.0kW
Stage	: 2 to 30
Max. Head	: 20 to 210 Meter
Discharge Range (LPM)	: 30 - 1800 LPM
