Unnati[®]

SUBMERSIBLE PUMP

**TOGETHER WE CAN DO IT
TOGETHER WE HAVE ALWAYS DONE IT**

MISSION

Company has well developed extensive manufacturing set up to meet any market demand in volume and quality thanks to its technologically advanced facilities.

VISION

Satisfied customer is our highest achievement which "Keeps us constantly striving to serve our customers with integrity and quality." Focusing on this goal with vigorous team efforts, we promise to serve them to deliver only the best.

QUALITY

In order to maintain the highest quality and performance of our pump sets the company has facility of ultra-modern testing and inspection instruments for continuous monitoring manufacturing process. We have electronic flow-meter in the computerized testing laboratory which provides unique facility of testing multiple pumps simultaneously for head versus discharge and overall efficiency at various position minimizing the time and human error thus making the performance report more authentic and reliable.

CUSTOMER FOCUS

At Unnati, customer is focus of attention for all activities at all level and every care is taken to see him delighted. His enquiry prior to sales is promptly responded for techno-commercial details and after sales-services to develop his confidence in our product and services. Utmost care is taken to define customer requirements or complaints by providing prompt and proper corrective actions thereby keeping him satisfied. Suggestions and complaints are also invited from the customers periodically to find out whether they are satisfied with the performance of product, timely supplies, packing & dispatch, behavior and attitude and whether they are really satisfied with the corrective actions taken.

An IS/ISO 9001:2015

Company Unnati Pumps Pvt. Ltd. has privilege to be one of the pioneer manufacturing units of India manufacturing Submersible Pump sets to obtain International Quality System Certification ISO 9001 way back on 15th August 1995.

Our Presence in GOVERNMENT OF INDIA

- Gujarat Water Supply & Sewerage Board (GWSSB)
- Department of Agriculture - Gujarat (I-Khedut)
- Department of Agriculture - West Bangal
- Department of Agriculture -Bihar
- Maharashtra Jeevan Pradhikaran (MJP)
- Andhra Pradesh State Irrigation Development Corporation Limited(APSIDC)
- Public Works Department PWD - Rajasthan
- PHED - Rajasthan

The Key

to our growth and success is simple

Together we can do it
Together we have always done it

CENTRIFUGAL MONOBLOCK PUMPS THREE PHASE

PRODUCT FEATURE

- High Suction Lift Up to 7.5 meters
- High operating efficiency results in less power usage
- Designed for wide voltage operation
- Superior mechanical shaft seal for longer life and effective sealing against water leakage.
- Can withstand wide voltage fluctuations from 300-415 Volts
- Class 'B' insulation
- CED coating cast iron components long life & rust free
- Easy Maintenance

PERFORMANCE RANGE

Power Range : 3.0Hp to 20.0 Hp
2.2kW to 15.0kW
Three Phase

CENTRIFUGAL MONOBLOCK PUMPS SINGLE PHASE

PRODUCT FEATURE

- Aesthetic Looks.
- Withstand Wide Voltage Fluctuations.
- High Suction Lift Up 7.5 Meters.
- Thermal Overload Protector (TOP) To Prevents Motor Burning.
- TEFC Capacitor Start & Run Motor With 'B' Class Insulation.
- High Duality Extruded Aluminum Body.
- Operating Voltage Range From 140v-240v 50Hz for Single Phase.
- Operating Voltage Range From 300v-415v 50Hz for Three Phase.
- Light Weight For Easy Handling

PERFORMANCE RANGE

Power Range : 0.5Hp to 2.0Hp
Single Phase & Three Phase : 0.37kW to 1.5kW
Max. Head : 24 Meter
Discharge Range (LPM) : 2160 - 50000 LPH
